|---------|--|
| Summary | <pre> blocks do not print across pages |
| Details | <p>To reproduce:</p> <ul style="list-style-type: none">• Create a topic with a <pre> block that spans pages (see below for example)• Try print it - it gets sniped at the end of the first page <p>(Printing this bug may even demonstrate the issue)</p> <p>I've tried printing from IE 6 and Firefox 1.5.0.6. Try a print preview from Firefox 1.5.0.6 to see the problem without actually printing. Printing to PDFCreator will also expose the bug.</p> <p>Strictly speaking this may be a problem with the browsers interpretation of the CSS that is applied by /twiki/pub/TWiki/PatternSkin/style.css to <pre> tags rather than a problem with the CSS itself. Given the choice between waiting for browser fixes and doing a CSS fix I think a CSS fix would be the best bet. That said the CSS may be invalid (not my area I'm afraid).</p> <p>Using the Web Developer toolbar in Firefox I can turn off CSS and the problem goes away.</p> <p>The problem occurs in both Printable and regular view.</p> <p>1</p> <p>2</p> <p>3</p> <p>4</p> <p>5</p> <p>6</p> <p>7</p> <p>8</p> <p>9</p> <p>10</p> <p>11</p> <p>12</p> <p>13</p> <p>14</p> <p>15</p> <p>16</p> <p>17</p> <p>18</p> <p>19</p> <p>20</p> <p>21</p> <p>22</p> <p>23</p> <p>24</p> <p>25</p> <p>26</p> <p>27</p> <p>28</p> <p>29</p> <p>30</p> <p>31</p> |
